***Allowable Subject Matter***

1. Claims 1-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: A method of performing threat assessment within a vehicle is disclosed and comprises determining a brake threat number, and determining an approximate deceleration at zero range value, in response to vehicle kinematics and kinematics of an object, as explained in paragraph 0045 (Spec.) and depicted on figure 2, item 1060 (Dwg.). Moreover, the prior art indicates that this particular device is novel and has not been published or patented by other entities.

In contrast to the present application, Sugimoto et al. (US 6,292,753) discloses braking force that is gradually decreased toward zero, however, the decreased braking force does not result in a deceleration at zero so that a vehicle is stopped.

In addition, Friederich et al. (US 6,624,747) discloses that a vehicle is braked with maximum deceleration until relative speed of a vehicle assumes a zero value. Friederich, however, does not disclose assigning a brake threat number to determine an approximate deceleration at zero range value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Insert punctuation (a period) at the end of claim 20 (line 5) after the word "profile".

***Conclusion***
